

**(a) Linear
single attempt**

Energy (J), proportional bars

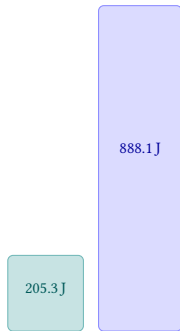

$$\text{EPG} = \frac{254.5 \text{ J}}{1 \text{ goal}}$$
$$= 254.5 \text{ J/goal}$$

**(b) Agentic
with retry**

$$\text{EPG} = \frac{2256.1 + 1358.4 \text{ J}}{1 \text{ goal}}$$
$$= 3614.5 \text{ J/goal} \quad \text{OOI} = 14.2 \times$$

**(c) Aggregate
 $n = 827$ goals**

Linear Agentic

$$\text{Mean OOI} = 4.33 \times (n = 827)$$
